

- **Canvas API**
 - Paul set up a test Canvas API on AWS for us to work with for authentication
- **Timeline**
 - Syllabus has preliminary schedule
 - Final presentation will be the last week of the quarter
- **This weeks Sprint:**
 - Bare bones functioning website
 - 1 week sprints for now, TBD if needed
- **User Stories**
 - Burndown chart:
 - estimate how long the user stories will take
 - Use to assign work
 - Check in at end to see how accurate / off estimates are
- **Team Updates:**
 - Front-end:
 - Mockups on wiki page
 - Mid-tier:
 - Worked on user stories
 - Worked on database interactions
 - Survey JS for assessment creation
 - We can use the library to build the quiz for free
 - Editor requires non-profit status to use the quiz-maker
 - For next sprint: work on the feedback email for the quiz
 - Back-end:
 - ERD is done
 - Want to check it out with mid-tier to see interaction
 - SQLite
 - SQLite Studio - Freeware for SQLite
 - DB browser - Freeware for SQLite
- **Overall Goal for week 3:**
 - Basic working version of site → the most bare bones
