- Addressed scrum practices
  - https://docs.google.com/document/d/1TVQANxC5y1nkeGnS7G6iWQJ1GV--9CG21AANjwQSrRA/edit?usp=sharing

- Clarified github questions
  - Workflow doc will be created (Justin will do)
    - Processes to outline:
      - Status Report
      - Commits to master branch
      - Keeping your own fork up to date
      - Local, fork and master repository explanation
- Team check-ins
  - General:
    - Upload basic file structure for project to GitHub - Mark
  - Back-end:
    - Done: ERD Design - Mahillet is doing, needs to share with team still
    - To-Do This Week: Create SQLite database (Justin)
  - Mid-Tier:
    - Done: Basic connection file is written (to access database) (Joe)
  - Front-End:
    - Began outlining site (hypothesized pages, and what featured would belong in each page)
- Discuss project themes
  - Teacher Search
    - Leader board
    - Up votes
    - Topic tags
      - User created
      - Pre-populates as well
- Source Tree
  - Desktop client for github (recommended by James)
